PRESS RELEASE

Subject: Streamlining Registration of Additional Qualifications for Post Graduate Medical Students

Post Graduate Medical Education Board (PGMEB) at the National Medical Commission (NMC) is committed to providing a medical education system that improves access to quality and affordable medical education, ensures availability of adequate and high-quality medical professionals in all parts of the country; that promotes equitable and universal healthcare that encourages community health perspective and makes services of medical professionals accessible to all the citizens.

The PGMEB in a bid to address the concerns raised by numerous students, has once again emphasized the need for State Medical Councils to register additional qualifications for students passing Post Graduate (PG) degree and diploma courses. This directive follows the Board's communication dated 23.6.2022 and reiterated during a meeting held on 15.6.2023, urging registration for specific batches under certain criteria.

Despite earlier instructions, the Board continues to receive grievances from students as their additional qualifications are not being registered due to seat classifications on the NMC website. Even though these students fall within the criteria outlined for registration, their seats have been categorized differently on the NMC's platform.

In response to these ongoing challenges faced by students, the PGMEB once again urges all State Medical Councils to promptly register the first four batches of PG degree courses and three batches of PG diploma courses admitted against the seats listed as permitted on the NMC's website.
